A: This looks like one of those hit-or-miss-but-probably-work-for-you-chances. As I can't find a direct answer, I'm gonna have to be more indirect. Aimtastic is a first-person shooter game. It's a training game for aimers. Is it what you want? It's a first person shooter game, trained for what? To practice. That doesn't mean it's a good choice for you. Perhaps its primary purpose is to practice. But, perhaps its purpose is to help you become a better aimer. In other words, perhaps it's not to practice, but to make you better at aiming. Is it what I want? No. You'll have to see what it has to offer you. If you enjoy it, you might try it. But don't get your hopes up That there is the problem. I don't know whether it's good or bad. And I'm not sure I do either. But I do know that it is the

problem that is at the heart of this entire question. Someone has already posted a version of your question. You might want to look at that one. But the accepted answer makes it clear that it's not for you. If your goal is to practice or improve your aiming, you might be interested in other games. My guess is this is you. You want to practice or improve your aiming in FPS games. That's an interesting desire. I am also guessing that you like FPS games. That's an even more interesting desire. But, perhaps you'd rather do something else. Like, maybe, play a game about making money. Or that's worth thinking about. I do think a lot of people would love to improve their aiming at FPS games. That's also probably why they like FPS games. That's the kind of game you're developing,

though. Perhaps you could have a game that's focused on making money, or improvement of skill at it. Or both. Or maybe you could play a different game. Or, maybe, you could build a new game to help you become a better FPS gamer. it's a good brand? ~~~ takno It's worth pointing out that sunroofs are pretty standard on most manufacturers cars. I don't know
