To keep your drawing, you can save it in one of the following ways: In your computer's Temp folder In the .ARTN file that is associated with the drawing In the .ABX file that is associated with the drawing There is also a more universal way to keep the drawing from being lost. Even after you close and reopen the drawing, it is saved in the location where the last drawing session was created, regardless of your work on the drawing or your last save location. You can also try to save the drawing as a new name by pressing Shift + F2. But this will create a new drawing and you need to close and reopen it, which will cause a new .ARTN and .ABX file to be created. Although AutoCAD may have a transparent background when viewed on Windows, it is not recommended to use the AutoCAD transparent mode unless the background is designed to be completely transparent. Using transparent mode will blur your screen and make it impossible to clearly see where objects lie within the drawing area. AutoCAD can create a user ID. Hi everybody! If you've been following me on Twitter or following me on Facebook, you probably already know that this month is Vegan Month! I've been a big proponent of veganism for a long time, but I wasn't too good at implementing it, especially in the kitchen. When I became vegan in 2013, I made all kinds of animal-free dishes, but I could never find enough motivation to follow through. It's easier for me to eat vegan than to cook vegan, and it was something that I had never really tried to do myself. I decided to give it a try in 2016, after a few months of trying to follow vegan recipes on Pinterest. And I was incredibly surprised when I realized how much better I felt and that I actually preferred being vegan! Since that time, I've been doing my best to come up with vegan recipes that are quick, easy and delicious. I thought it might be a good idea to share some of the recipes that I've been making. I hope that you'll find some ideas that will make it easier for you to incorporate more vegan meals into your own diet! First, here are some simple ideas: I am pretty sure that you can find vegan meat substitutes in pretty much any grocery store. You can try making some pasta in your favorite sauce and adding some vegan cheese, meat or nuts. If you can find whole-wheat pasta, try to stick to it! Whole-wheat pasta is great for you because it's better for you than regular pasta, it's usually cheaper, and it has a nice texture. If you're going to make a dessert, try to stick to vegan cakes and pies. There are some vegan cakes and cookies, but I find that they're usually not the best quality. Try to find some good vegan milk for drinking. I don't know what they put in the milk that makes it taste so good. I
