SQL-based application programming interface (API) This was initially released with version 16, and has been improved upon and is still supported in current releases of AutoCAD Cracked 2022 Latest Version. This allows AutoCAD to access database information for use in the drawing environment. This API was derived from a technology from Autodesk called AniML, which can be found in most recent releases of AutoCAD. Autodesk has created a line of enterprise mobile apps that use this technology. These include a mobile app for Mobile Design, Mobile Drafting, Mobile Project Managers, Architect, Civil and Interior designers, and Landscape architects. Autodesk also offers an API that can be used to build native mobile apps. Python programming language JavaScript programming language for web-based drawing, or in AutoLISP, is also available. A recent extension to this is JavaScript programming for the AutoCAD platform. This allows AutoCAD to make use of JavaScript's features of dynamically updating the layout of a drawing. Subscription AutoCAD services are offered by Autodesk for AutoCAD services such as being able to access shared drawings and have cloud storage and processing of drawing data. Integration of other applications, 3rd-party add-ons AutoCAD relies on a number of APIs to allow for easy integration with other programs. Autodesk Exchange Apps (third-party AutoCAD-based applications) is a collection of add-ons to AutoCAD provided by third-party vendors and then made available to users. These add-ons are mostly 3D modeling software. Many of these products are offered as an alternative to AutoCAD, but are distributed through Autodesk's Application Store. Architecture The architecture of AutoCAD has been the subject of a number of books and papers. The conceptual model presented in that section was developed for the Windows version of AutoCAD, but the concepts presented can be used for all versions. A new architecture was introduced in 2011, but has only been implemented in AutoCAD 2012. Language AutoCAD's.NET architecture allows for programs written in the Visual Basic, C#, VB.NET, or JScript programming languages. VBA provides access to AutoCAD's functions and macros, and a number of add-ons have been written that can call directly to VBA code. In 2010 AutoCAD added a Ruby scripting language, enabling users to script AutoCAD directly, although a1d647c40b
