Weatherbug 3.10.1 Windows 7 - Wallpaper Designer! Weatherbug 3.10.1 is an add-on for Windows 7 which allows you to watch, manage, and display weather information on your desktop. It does exactly that by combining the weather forecast, current conditions, and history information in one easily accessible visual of what the weather will be like all day long. Weatherbug has a zoomed in feature that lets you see a 1km resolution weather map which is just awesome. The interface makes it quick and easy to: ● Watch and manage the current conditions of the current weather area. ● View and access the history of over 4 million weather events and forecasts from around the globe, through just 1 second. ● View your current weather forecast from the last day to 4 days into the future. ● Customize your interface with 3 different skins. ● See the forecasts, current conditions, and history information for over 2000 weather areas across the globe. It is quite simple to use but it's still not very user friendly. It's very similar to the Windows Desktop Calendar View which works in a very similar way. So it shouldn't be difficult to get used to. The application is free but there is an optional paid ad-supported version which does not have ads. How to get the Windows 7 Theme: Weatherbug 3.10.1 works only for Windows 7 and is compatible with both 32-bit and 64-bit versions. If you do not have a copy of this software, you can download it for free from the website. Theme: Wallpaper & Themes Your Windows desktop wallpaper is the perfect and eye-catching way to add your personal touch to your Windows computer! Today, millions of PC users spend a lot of time decorating their desktop and office walls using your favorite desktop backgrounds. [IMPORTANT] Note that wallpaper requires an empty desktop surface. If you have any image saved on your desktop, just delete the picture. If you need help with this, click here for a video tutorial! 3. Click the "Desktop Background" button in Windows Control Panel, and then pick a wallpaper from the list or click "Import" and choose a picture folder. 4. On the next dialog, scroll to the bottom of the list, and then choose "Choose A New Desktop Background" from the dropdown menu. Click "Back" to return to the main control panel screen
