AutoCAD Architecture is a 3D modeling program for architects, structural engineers and interior designers. With AutoCAD Architecture, a user creates a project and then designs a model of a project, a model of the construction materials, and models of the surfaces and solid models of the project's interior and exterior surfaces. Users can then use their work to design in 3D. In addition to 2D drafting tools, it includes a set of tools for laying out and creating 3D models. AutoCAD Architecture and Design is the third version of AutoCAD Architecture. The application adds the following functionality: * The 3D model can be easily rotated in 3D and 3D views * Using the new 3D Viewer tool, users can view their model from any angle, create and work on 3D drawings, and view animations that show how a model would look in 3D from any angle. * Using the new 3D Modeling tool, users can create a 3D model, edit the model, and view the model. * The new Dynamic Materials feature enables users to easily add and delete materials to their model 5b5f913d15

A general survey of bird haemoproteids detected two genera and eight species of haemoproteids from blood films taken during the breeding season from May to September from seven breeding colonies in three locations on the Central and Eastern Highlands of Botswana. Leucocytozoon spp. (18.8%) was most common and was divided into two morphs. The prevalence of the two Leucocytozoon morphs varied according to site; the most prevalent morph was of a novel Leucocytozoon species. Plasmodium spp. (8.4%) were also detected, but only in one species. A morph of Haemoproteus spp. was recorded at all locations (10.7% of birds). To our knowledge, this is the first report of Leucocytozoon from Botswana. FILED United States Court of Appeals Tenth Circuit
