SpeedyTube Free is a freeware application that will help you download YouTube videos in three different formats. Password Protect Document with Simple Password Generator Have trouble thinking of a password that won't be easily guessed by children, friends or anyone with simple password-guessing skills? Password Maker will help you out of your trouble! If you want a secure document that is easy to remember for you and your friends, or children, or anyone who may want to remove your content, this is the software for you! The program uses the YASS technology, which is based on the YASS extension (YASS stands for Yapper Software Authentication System). YASS is a special window that pops-up when you open a password-protected file or download. YASS automatically generates a password that you can copy and paste anywhere you want, avoiding the needs of filling a big textbox. It also allows you to give a name and description to the document. The user-friendly interface of the software allows you to create text passwords with no limitations. You can set the minimum, maximum and leading characters; or choose the number of characters you want, so you can create any password you want. Password Maker supports not only MS-Word but also many other document types such as rtf, PDF, HTML, text etc. ASniffer 1.10.0.8 ASniffer is a windows tools for upload file to AVI. Just Download Firefox How Many Garbage Files and What to Do About It? Microsoft Edge won't clean all the shortcuts you create, despite your best efforts. Anyone with an Internet connection has downloaded at least one shortcut to a web page in the past. Creating a shortcut allows you to easily find a web page or share a site with others. If you're not a Microsoft Edge user, you may be surprised to learn that Edge won't automatically clean all the shortcuts you create, even if they're kept on the desktop. "We knew there was something wrong, because our Windows 10 preview upgrade advisor kept telling us that the app was too big, and that Windows hated it. Now we know why it's so big and who's responsible: FileXp.exe is a version of the famous Windows utility Regedit that installs itself on Microsoft Edge users' computers, and it uses 50MB of space in both 32-bit and 64-bit versions. As far as we know, that's the biggest space hog in Windows. "But there's no reason to have Microsoft Edge install Regedit, and it's not the first time the company has made such a choice. It turned out that after disabling Regedit, Windows still continued to let Edge install it, so we tried using Process Explorer to track down the program, and we found this out in the last month. If you're worried about how much space your apps are taking up, you might
