In accordance with the foregoing, it is hereby ORDERED that the motion of defendant Blinder, Robinson to stay the proceedings in this action pending arbitration is granted; and it is further ORDERED that the Court's decision of July 18, 1988 is modified and the matter is remanded to the Commercial Division of the Supreme Court of the State of New York, County of New York for proceedings consistent with this decision; and it is further ORDERED

that the action is stayed until such time as the Supreme Court of the State of New York has issued a decision on the motion to compel arbitration; and it is further ORDERED that upon the exhaustion of the New York proceeding, the plaintiff's claims in this action shall be dismissed without prejudice. [A typical case of "Sensibilia Insufficiens"]. The term "Sensibilia Insufficiens" has been introduced by Bradley in 1955 and can be described as any complaint of sensations which do not reach the level of "Sensibilia Undecompensata". "Sensibilia Insufficiens" can be regarded as the "border-line" of the disorders of somatic sensibility. We describe the case of a man complaining for 30 years about strange

sensations of his body. This person has been seen by general practitioners, specialists, clinical psychologists, psychotherapists and was hospitalized in psychiatric wards on several occasions. He tried to keep his symptoms a secret because he was ashamed of his illness and could not imagine that people could think he was "crazy".Story highlights Rudy Giuliani said Monday that
