Find out what lies behind Agent 180's secret code name - whether it's a Hollywood high life, a dangerous cover, or something far, far worse 179a The Butterfly King, c. 1962 London 179b The Long March, c. 1985 Moscow 179c The Golden Clan, c. 2005 Shanghai 179d The Romanovs, c. 1907 London 179e A Fishy Business, c. 1979 Miami 179f A Rainy Day, c. 2004 South Korean War 180a The Lost Path, c. 1984 Laos 180b The Crocodile Cave, c. 1972 Congo 180c The Black Vaults, c. 1989 Lebanon 180d The Precarious Partnership, c. 2006 Paris The Three Steps to Control What You See 180-180a The Butterfly King (1/2) 0:00 Long March (1/2) 0:30 The Golden Clan (1/2) 1:00 A Fishy Business (1/2) 1:30 A Rainy Day (1/2) 2:00 The Crocodile Cave (1/2) 2:30 The Black Vaults (1/2) 3:00 Precarious Partnership (1/2) If your encounter with 180 starts as a straight 180, at the very next clock your path will branch. If you'd like to see everything the 180 can offer, choose "The Three Steps to Control What You See" to proceed in the story. Otherwise, continue to the main story after finishing the three steps. If you would like to see past discoveries and a few extra things you can do with the game, pick "A Curious Offer" at the end of the game. About This Game: Spy spoofs Hollywood, Mash-Ups and Corporate intrigue, Realistic voice acting and a fun, free-to-play interface. A spy, a spy, who pulled the trigger... The AGENT 180'S CASUAL GAME is a cool and free version of the spy-adventure game, 180, where you are an elite secret agent, working for the CIA and your cover is a porn star. Feel like James Bond, Brian O'Conner, Jason Bourne, or Rainbow Six? Agent 180's Casual Game is the lighthearted version of 180. Less is more. We are confident you'll enjoy the casual version for its zany humor and casual, fun interactivity

## **180 Files: The Aegis Project Features Key:**

Project Grimoire (video game)  
Springfield rescue unit  
Gaming Angels (modding community)  
This mod uses BackerZ for support  
This mod is updated by Goblin Rav  
This mod is a two player multiplayer mod  
Kane is no longer working on this mod

Core elements of the map are given by the 180 files package. Ground textures are provided by a community member and credits at the end of the mod.

Purpose of Mod:

A location neutral large scale environment hostile to humanity. By keeping your units beyond a range of destructible blocks the idea is, if you encounter an enemy out there, you won't find his or her base out of reach. Stuck in empty space you'd feel like a salmon swimming in a pond of piranhas.

## **Credits:**

- 
- Goblin Rav for creating the original version of this mod.
  - Cedral from the RUSSKI SYSTRO project.  
He helped with scripting and in-game debugging.
  - Edbu over at Tomascot for the awesome Portal!  
Set of tiles used for the Portals are modified versions of Infinity Portal's!

- **180 Files: The Aegis Project Activation Key**

180 Files is a 184,000 word interactive novel with adult themes, written by Karelia Hall. It is a fun and fast paced thriller that will keep you on the edge of your seat. If you enjoy point-and-click adventures and intrigue and your role-playing games tend to get a bit serious, you may enjoy this lighthearted spy thriller. Play as male, female, or non-binary; as gay, straight, bisexual, demisexual or asexual. Choose from an assortment of gadgets to help you. Decide what's more important to you - the mission, or yourself. Romance an intrepid reporter, a charming executive, or a brilliant scientist - or pique the interest of a dangerous enemy agent. 1 of 3 Full Reviews of 180 Files: The Aegis Project Review by Khara Beth-Zarch I've been a fan of interactive fiction for a long time, enjoying interactive storytelling since I was a kid. Interacting with my geeky friends over the shared experience of playing tabletop, video, or boardgames was so much more fun than just watching them play by themselves. But with video games, you always knew what the outcome would be - there was no suspense to the story because you always knew how the game was going to turn out. While board games may be a bit more complex, they're more traditional; the outcomes are clear and the player knows their moves and role beforehand. 180 Files is an interactive spy thriller. The same as in board games, there are no limits as to how the player's actions can affect the story. The player's actions are the only things that effect the outcome. You never know what is going to happen, it's all up to you. But can you get your cover intact? Will you uncover the truth? As Agent 180, you are a superspy in the mid-1990's. You're sent on an undercover mission into the evil company known as The Aegis Project, and you're sent undercover to befriend a reporter who's also there to investigate. The story unfolds as you go from job to job, breaking an endless number of rules as you need to, to uncover the many secrets that you discover. During each job you will have to make a series of choices, and as the story unfolds so does your character and his choices. 180 Files is going to be a light-hearted, action d41b202975

## What's new:

**(Part 2) Posted by Cedric on Thursday, July 16, 2013 · 3 Comments On April 10, 2004, PATCHFORTH, a non-profit corporation with a mission of accelerating the adoption of Windows, purchased the only original version of the Windows NT operating system (Version 3.1) to be built and distributed by Microsoft and the first pair of images created by a commercial partner named Codesourcer. The following story documents the process of recovering, restoring and resurrecting these twenty boxes of media history. This work was completed through physical and virtual preservation efforts undertaken by MASP, where they were transferred to several hardened servers and backed up on tape and then to multiple DVDs. They were then secured and stored in a “time capsule” buried in an undisclosed location in central Florida. As of this writing, the whole collection has been transferred and digitally archived over a span of more than 10 years of torturous institutional storage via Microsoft SharePoint Solutions. The twenty non-operating images on their original media are now in MASP’s capable hands ready for restoration back into runnable operating systems (bit by bit). This story was never about return-to-scarcity or inventory-sizing for us. It’s about 1) the man who wanted this badly, because of his love of NT and his vision for Windows from its first commercial implementation, his ego and unbridled faith in the not-so-reasonable return of NT and 2) to provide people with an example of what one person was willing to do to preserve the OS on the upcoming 30th anniversary of Windows 3.1. This story is hopefully a testament to the grit and determination of any one person who is placed in a daunting and daunting environment willing to risk the entirety of their professional career to save an operating system that many should have remained untouched in light of its impending “Death March” and nevertheless did. So, on**

**Christmas Eve, 2003, PATGUARD founder, Paul O'Neill discovers the PCs where Intel and Microsoft employees bought PATCHFORTH after a news article about the company referenced the fact that it wanted to place the archive of the operating system on the last batch of original Windows NT systems to ever be built by Microsoft and on any brand new computers sold by Intel. He contacted them expressing his interest in working with them. Two weeks later, he and an engineer named Andy French met with Bill Heneghan and Dennis**
