RAID - you need to buy a special set of discs, different from the stock OS:  
Windows 7 Canon Service Tool V2000  
Download - The firmware for the EOS "Ready" programm is not available for download with the camera! You cannot download the firmware from Internet - you need to buy a special set of discs, different from the stock of the camera. We can only download the firmware for the camera on the factory disc! Canon Service Tool V2000 Download - You can also download the Canon GPhotoTools (GPS) program (for Windows or Mac). If you own the Canon GPhotoTools (GPS) package (if this is your package, you can use it as well!), download this from: If you don't have it, you can buy it online at Amazon, (follow the links above - there is

---

a good deal with a free trial) or you can order it from the Canon website: If you have problems with the firmware download, you can download the firmware from: How to do a Canon Service Tool V2000 Download for Windows 7? 1) Mount the computer's hard drive on the camera, such as an optical drive by plugging a USB cable from the device. 2) Turn off the camera, and then turn on the computer. If the instructions were done correctly, the Canon Service Tool (V2000) will automatically start. 3) If the Canon Service Tool cannot start, press the button on the back, or hit the Canon Service Tool icon for 5 seconds. 4) To view the information about the computer and the firmware for download, press the button, "F.O.I." (the EOS Firmware

---

Upgrade Software for Windows only). The firmware for download can be found on the disc label shown on the back of the camera, but you need to use a specialized remote control to actually find the information. The disc will be labeled: "EOS FIRMWARE UPGRADE SOFTWARE V0.8"

You will need to download firmware upgrade utility software for each of your models, and this is usually not a small list, since each model has its own firmware file. Canon V2000 Service Tool Download  
Canon Service Tool V2000 Download - Software. Canon Service Tool v2000 is a Windows based utility which provides backup function of user settings (personal information) and user data like images, videos
