9-on-9 tactical action RPG games have been increasing in number with time. However, most of them lack in depth of gameplay and dark atmosphere. This is the reason why we thought to develop a game where the players can enjoy a new and rich experience of tactical RPG games. As a result, with the development of the game, we made it possible for the players to make their own online adventure in the Lands Between. Your adventures in the world will be unique and different from others, and you will encounter endless challenges and threats during those adventures. Your player will become strong in strength by battling against others and making your way clear. What is most important is that, with the drama being created, your personal story will also be told. This is a storyline where the characters created by the player will make their way in the world of the Lands Between through their own actions. Therefore, a game where the players can freely build their own routes in a vast world with a variety of situations is being developed. What do you think about the game that is being developed? *The official website was updated on April

“Greetings players, We at Team BlueFire Games are excited to announce that we have officially released Tarnished, our new Fantasy action RPG for Windows based on the popular Elden Ring engine. The Tarnished has been in development for over 2 years as our first of many actions RPGs. We are very proud of the result and are confident you will be impressed with the quality of this game. Over the course of our journey we have worked to improve every aspect of the game and we hope to continue the process of improvement. We have also used feedback from our daily play through the test session from our beta testers to add some great new features and gameplay elements to the Tarnished. Our most high-profile improvement was the wonderful new romper suit for the characters to show off their outfits in the field. We are happy to announce that with this new feature the complete character set has been updated and are ready to use. The Tarnished as you can already see has very beautiful and high-quality graphics and music. For the first time we are also using the engine’s music synthesis for background sounds, which we will be adding to different areas of the game. The game is fully playable in Windows XP and higher and can be played with keyboard or gamepad. We recommend using the “Tablet Keyboard” feature of Windows 7/8.” We have no intention of lying to you about the release of the game. It is available from the Elden Ring store.
