Download and Watch Ice Age Collision Course Free Movie Hd (720p) and mp4 | Free Video Download | FreeMp4.com. Q: Why can't we make both the choice of the quantifiers and the choice of the domain? I have a problem solving a seemingly easy problem in set theory. The problem says:  $m$  is a real number.  $n$  is a natural number. We claim that  $m \cdot \frac{1}{n}$  equals to  $\infty$  if  $n \neq 0$  and  $0$  if  $n = 0$ . What I did:  $m \cdot \frac{1}{n} = \left\{ \begin{array}{cc} \infty & n \neq 0 \\ 0 & n = 0 \end{array} \right.$  Suppose  $n \neq 0$ . Whence we have:  $\left\{ \begin{array}{cc} \infty & n \neq 0 \\ 0 & n = 0 \end{array} \right.$   $\mathbb{R} \subseteq \mathbb{R} \cup \{\infty\}$ . Whence we have  $\mathbb{R} \subseteq \{\infty\}$  And whence we have  $\mathbb{R} \subseteq \{\infty\} \cup \{0\}$  In general, we have that:  $\mathbb{R} \subseteq \{\infty\} \cup \{0\}$  It's clear now that the problem is wrong because the statement is false. But the way that I solved it is not clear to me. I used a quantifier to say that there are two disjuncts and chose a specific set to see that it was a contradiction. So, my question is: What is the correct way to approach this? A: Your reasoning is correct. Your only mistake (as you yourself noted) was applying the definition of infinity. The correct statement is: For any natural number  $n$ , we have that  $n \neq 0$  and  $n \in \mathbb{Q}$  if and only if  $n \cdot \frac{1}{n} = \infty$   $\tag{1}$  The reason the problem is
