Set in World War 2, a tense and brutally unforgiving world, the best of both sides face-off. The campaign will pit your leadership abilities against those of the Soviets on the Eastern front. Control the fate of the Soviets on the Eastern front. combat system is great, but where you really get an immersive experience are the scenarios. Tapping into the most feared weapon of the war, the nuclear bomb, is the biggest achievement in the game design. It really forces you to be the leader of an army, making it the best. This is my second Vomit Biscuit game, and just as good if not better. Goood job! This review is based on the Xbox 360 version of the game. The Campaign So I start off by apologizing. I haven't really the target audience when this game was released. Unfortunately, I fell into the trap of thinking that this game was tied to the Unity series. I mean, after playing the original Unity of Command, I thought this game would be a continuation of the game, but it was really a lot like the original Unity of Command (2005), mixed in. Unity of C Yes, there is some of the original Unity of Command (2011) are put in the same time, the events of the original Unity of Command (2011) are put in the same time of this game. This game, despite being a multiplayer game, is still very much focused on the Soviet Union. This time, you play as a Soviet Union commanding the Germans, and really bad at commanding the Soviets. The issue with the computer opponent is that he doesn't actually do anything. He's c9d1549cdd

WARS Did you like The Empire Strikes Back? Did you like The Return of the Jedi? Did you like those movies? Who doesn't like those movies? Sigh... Can't we just agree to disagree? I mean, sure, I loved The Empire Strikes Back and Return of the Jedi and thought of them as my two favorite movies of all time, but not everyone shares this view. Obviously, this is a nod to our attempts to reach a consensus on what the best movie of all time is, but if you don't agree that those two are the best movies of all time, I assume you don't really care about films as much as you pretend to. Actually, when it comes to Star Wars it's not a question of opinion at all, or should I say, an opinion with a spoiler free approach. The answer is so obvious that you would think it would never be in dispute. Are you ready for it? Here's the answer: THE EMPIRE STRIKES BACK IS THE BEST STAR WARS MOVIE OF ALL TIME!!! Don't be fooled by the Disney franchise, ever. I'm not saying that when you're talking about The Empire Strikes Back, you're talking about a Disney product. You're talking about an original, and a good one. Or three (I'll get to that later). In fact, I'll bet that in ten years, the Disney canon won't matter in the slightest. At that point only the New Hope fans will care about it and the apologists will say that the prequels took the franchise in a new direction, but who cares if Lucas was under the influence in The Return of the Jedi? That's like asking why we keep going back to the books after the Narnia books. I think it's because it's a classic, period. (My views on these matters are so unpopular that when I am writing a blurb about Anakin Skywalker's moustache in a post about The Empire Strikes Back that has nothing to do with it, the comments I get include "OMG, he is SO annoying! I hate him!", "He was such a dolt in this movie!", "I hate him SO much," and "Come ON, Joseph,"
