We additionally give variant types and as a consequence type of the .Physical Sciences Division Research Highlights December 6, 2013 The Research Division of the Physical Sciences Directorate at the Los Alamos National Laboratory has been awarded 8,500 science and technology contracts valued at \$78.1 million for fiscal year 2013, according to the Laboratory's Research Log. The awards are made through the Laboratory's Integrated Resource Facilities (IRF) process, as described by Los Alamos National Laboratory News on the IRF initiative. These contracts are divided between the Laboratory's Theoretical and Experimental Sciences (TES), Environmental Sciences and Technology (EST), and Engineering Laboratory (EL) divisions. One award of \$1 million was made to the TES division. The award was for analysis of neutron and gamma-ray data in conjunction with human data. The aim is to develop a sophisticated method for identifying and quantifying gamma-ray emissions that are consistent with nuclear explosions. This analysis is needed to support military and civilian decision makers in detecting and quantifying nuclear explosions that occur during military operations and nuclear tests
