Cadernos e Memorandos The history of the first three months of 2016, of the ship Comfort and the Fortress, the Hospital of the Holy Spirit and the House of Virgins, María Esther. The Three Months 2016. Ship Comfort and the Fortress. The Fortresses were built in the 1920s when the Navy renovated the 7" anti-submarine guns of the casemates and installed pre-built concrete "crew accommodation" blockhouses. Blocks were placed high up on the sea side (north) to protect against the air raid. This simple design was used again in the 1960s, with more sturdy blocks and anti-tank mine protection. The blocks of the blocks are built over a spring of steel reinforcement. However, they don't have only an anti-aircraft function, but they also provide protection against tanks. Those areas were planned for the construction of an anti-tank road. The blocks are fitted with a machine gun. Photo after the shooting at the Fortress of the Panón border with the sovereignty of Argentina (1970s) Here is the main sequence of the fortress, the blocks along the boarder. Click for a larger image The fortress had a large concrete water tank for the operation of the ship. This is the building of the water tank and the concrete "crew accommodation" building (Blocks 1-5) which is also used as headquarters for the base. The Fortress has walls with anti-tank mines (M324) and also anti-aircraft weapons. The Fortress also has a defensive command post. The Fortress also has a large water tank. The Fortress has a helicopter landing pad. Here is a photo 0cc13bf012
