Since 2010, AutoCAD has been part of the Autodesk portfolio. AutoCAD is still the leading commercial CAD application worldwide. In 2015, the estimated sales of AutoCAD were over \$1 billion, the vast majority of which was from desktop and laptop versions of AutoCAD. Other versions of AutoCAD include AutoCAD LT, and AutoCAD Civil 3D and AutoCAD Revit. History AutoCAD runs on a variety of microcomputers, including Apple Macintosh and Microsoft Windows. It is available in 11 editions. In 1982, Allen Buck and Dave Dittman started a business known as Albrecht & Dittman to market a program named Diversified Drafting System (DDS). The program ran on the Apple II and the Commodore PET, and introduced multi-user 3D drafting. DDS was released in 1984, and by 1985 the company had sold approximately 8,000 copies. DDS was later renamed AutoCAD, after the first letter of each name was concatenated. In the 1980s, there was no dominant CAD software platform, so Albrecht and Dittman began consulting for companies to help them design their own CAD systems. This work eventually led to the founding of Albrecht Software in 1984. Albrecht developed a 32-bit version of AutoCAD that could run on IBM PC compatible computers. The 32-bit version was released in 1986. In 1988, Albrecht acquired a licence to create AutoCAD on an Apple II platform from Equifax Inc. Autodesk was founded in 1989. In 1995, Autodesk entered the CAD software business through an acquisition of Albrecht Software. The next year Autodesk released AutoCAD for the IBM PC platform, followed by the Mac version in 1996. Albrecht Software became Autodesk's AutoCAD division. When the acquisition occurred in 1995, Autodesk acquired the rights to distribute AutoCAD on Microsoft Windows. Since then, AutoCAD has been available for Windows PCs and Apple Macintosh computers. In 1999, Autodesk introduced the first version of AutoCAD for Linux. By the end of 2004, the number of registered users of AutoCAD surpassed 4 million, with 20,000 new users joining each month. On September 18, 2016, Autodesk announced a merger of the business units of AutoCAD and Maya
