Booty Diver is an arcade style game that features a ball of string as the main character. The goal is to guide the ball through a series of increasingly challenging platforms and throughmazes, while avoiding obstacles and collecting new items along the way. As players advance through each level, the difficulty of the game increases, with some levels even requiring backtracking to avoid an area's more treacherous hazards. Honeysphere's unique approach to video games focuses on bringing some of the old school arcade-inspired experiences, often seen in the 80s and 90s, into modern versions of familiar genres.Q: Why is convert to basis defined for certain functions but not for others? TL:DR: Definition is different for functions with different (signed) input. Why? The following MWE reproduces the problem. \documentclass{article} \usepackage{amsmath} \usepackage{paralist} \setlength{\parindent}{1cm} \DeclareMathOperator{\ConvertToBasis}{ConvertToBasis} \begin{document} \paragraph{First paragraph} \begin{displaymath} ewcommand\ConvertToBasis[2]{\mathop{ConvertToBasis}\paren{\textstyle #1,\textstyle #2}}% \end{displaymath} \begin{equation*} \ConvertToBasis{\sin \theta} \end{equation*} \begin{displaymath} $ewcommand \verb|\ConvertToBasis|| a sis $$ \operatorname{ConvertToBasis} \$ #1,\textstyle #2}}% \end{displaymath} \begin{equation*} \ConvertToBasis{\sin \theta} \end{equation*} \end{document} Why is ConvertToBasis defined for functions with different (signed) input? I was always under the impression that the output of the \ConvertToBasis would depend on the #1 (the function) and #2 (the argument). If I run the first example, it works as expected,

A dark, deep, rich 2.5D platformer that will leave you breathless! Twice the size of a small child! Puzzle-platformer gameplay with twists and turns! A huge game that will leave you frustrated and wanting more! Dark Prison is a challenging, beautifully-designed 2.5D, puzzle-platformer with a twist - it's the first-ever game that plays out like a movie, when you die, you get a chance to restart the level from a safe haven and play the entire game again! Dark Prison was originally inspired by the idea of a child being locked in a dark room; a place they believed no one could ever find them. But once the child is locked away, a mysterious force begins to bring them closer and closer to their darkest fears. Dark Prison started out as a simple, yet challenging, actionplatformer. But the more we built, and the more we learned, the more we realized we had an almost unlimited potential of creating something beautiful and unique. The challenge of managing all of this came from the need to remain focused while also staying flexible and embracing the possibilities. The result was an unexpected journey that will leave you breathless. To summarize, the game is a puzzle-platformer that is all about puzzles. But it's not about the puzzles themselves, it's about how to solve them using the limited resources available to you. Every time you die, your fully-rendered and fully-animated head comes crashing to the ground and your footstool drops out from under you. You're not going to simply be crushed by a collapsing pillar. A true hero needs to find the perfect solution to these puzzles. And as you play the game, all sorts of new and exciting mechanics will start making themselves known. Each time you die, you will have the opportunity to explore a new area of the game - a place where new mysteries lie waiting to be discovered. The purpose of this game is to open your eyes to the depths of your imagination, to the secrets it keeps from you. Your progress will be saved in a safe place until you can open it to a completely new world. You can still die, and each time you do, you have an opportunity to explore a new area and try to find the solution to the puzzle that put you in a difficult predicament in the first place. This new area will become your starting point for the

being made available until 22 May Downloadable episodes on **Xbox One and PlayStation 4 are up to Episode 5 / Maxine. It's** that time of the week again, folks, when we all gather around for the latest batch of behind the scenes videos. This week, we bring you episodes two through five of Life is Strange 2. Bits and pieces PlayStation - the Divemaster Adventure of the Week is based on an episode from season one, I absolutely loved the story of Jeremiah and why he needed to escape Point Grace; I suspect it has a lot more to do with how the survivors of the explosion dealt with it rather than the lighthouse itself, which is a stark contrast from where we left in the story. I'm a sucker for 'big moments' in the story and kept hoping Maxine would find herself floating on the surface of the ocean in the back of a blimp. The Walking Dead - RTV18 has released a picture of Negan and Lucille, much in the style of that on Game of Thrones. Note that it appears to be a promo poster for Season 8 rather than Season 7. Eurogamer - a series of screenshots showing Maxine's early life and how her character developed throughout Life is Strange 2. Eurogamer - In episode 4, Chloe ditches her PAX carry-on and wanders the streets of the city without it. On a fluke she spots a waiter with her bag and helps him out before he steals it from her. This scene isn't included in the Steam version of the episode, but will be included in the episodic retail game. A message was also found in a bag, revealing that there is a '20/20' level hidden in the episode. PC Gamer - a new episode, holding a writers room session, is being recorded and should be available within two to three months. Check out the new character, Lincoln, appearing in the latest episode: A reference to the character was found in episode 1, where Maxine is represented by a young him. Tell us about them As soon as I saw that Clementine would appear in episode 5, tears welled up in my eyes. I couldn't help feeling sentimental for her character, knowing now she'll be there throughout the entire series. She's been there right from the start, and it's amazing to see her grow up in a more natural setting in such a short time.
