Mixcraft Pro is a Free and powerful sound effects tool for home recording and music production.Q: What is the difference between an OpenAPI spec and an interface? Which of these will yield the same results in tooling like OpenAPI-Generator? An interface (unnecessary?) A Swagger spec (really?) I have an API which I'd like to have tooling generate some JSON documentation for it. My intranet provides a swagger and an OpenAPI spec file (with a different implementation). If I have both, what is the difference? A: An OpenAPI specification is a text file that defines a series of JSON objects.
