
MegaPing Crack Download

MegaPing Crack+ Activation Key

MegaPing Activation Code is a small free, stable and extremely reliable software application, with a clean and efficient feature lineup. It integrates all the standard tools you are looking for, including a powerful and capable security scanner, network tools, and a great array of system information. The application is quick to integrate into Windows, install, stable and fast to run. MegaPing would love to see your results, features and votes! Feel free to take a look at our other categories =====

===== Hello, If you are looking for a free and easy way to manage your router's configuration, you came to the right place. This is my first freeware, but I think it is worth it. -- Please don't forget to rate this app. Do you need a fast, easy to use and reliable scan tool for your web applications? This is a mini-installation, you can try it in 5minutes. What you will find:

- Free to use, no charge, no ads, no tricks. No registration!
- A multi-purpose tool for checking web applications performance, security, availability, reliability and more.
- A Web Application Network Management (WAN-M) monitoring and performance analysis tool.
- An easy-to-use Nagios-like web application monitoring template.
- Tools to monitor all 4 layers of the OSI model: Network layer (TCP), Transport layer (UDP), Session layer (TCP) and Presentation layer (HTTP).
- Various monitoring and reporting solutions for web-based applications.
- An Open Source and OSI-compliant web application monitoring software and website:
- A Public API and a REST API (JSON API) for integrating with other services and applications.
- An extensive support, thanks to many hours of development
- A full documentation
- Free updates for life
- No warranty. No registration. Use at your own risk.

MegaPing With License Code X64

MegaPing is a lightweight software application that comes with support for a bunch of network utilities, such as DNS lookup name, DNS list hosts, Finger, host monitor, IP scanner, NetBIOS scanner, network time synchronizer, ping, port scanner, share scanner, traceroute, and WHOIS. In addition, it is able to reveal detailed information about the running programs and processes, local shared resources, as well as system data. Scanning capabilities MegaPing gives you the possibility to work with different types of scanners, such as port (TCP and UDP ports), IP, NetBIOS, and share. You may scan individual computers, a range of IP addresses, domains, or the selected type of computers inside domains. It integrates a powerful security scanner that helps you get information about the NetBIOS name, configuration data, open TCP and UDP ports, transports, shares, users, groups, services, drivers, local drives, sessions, and printers. The scan results can be saved to HTML or plain text reports. Network tools MegaPing allows you to assess the performance of your network using various utilities, such as DNS list host, DNS lookup name, network time synchronizer, ping, traceroute, WHOIS, and Finger. Plus, you can log errors and check out real-time

network connection status and protocols statistics. Process and system info The utility helps you view details about all running applications and kill the selected one, as well as check out info about processes (e.g. PID, memory usage, threads), modules and services. You can track all system connections, IP, ICMP, TCP and UDP statistics, interfaces, IP routing, and ARP data. A powerful and efficient network toolkit All in all, MegaPing comes with a multitude of utilities for helping you diagnose network issues and get information about your connections, and is suitable especially for system administrators. What's New: Version 2.14 Powerful and efficient new and improved Anti-Virus engine Smart Security scanner. New fingerprinting engine that detects malware and viruses in real-time and prevents it from accessing your computer. Added more powerful virus engine that can detect viruses in real-time. Added a new Anti-spyware engine that can detect and remove spyware. Improved Network analyzer. Improved SMB network analyzer. Changed the number of ports displayed in the status bar. Added hyperlink to the help page in the menu

MegaPing Crack + [Updated] 2022

MegaPing (Microsoft Network Monitor) is a free software application that comes with support for a bunch of network utilities, such as DNS lookup name, DNS list hosts, Finger, host monitor, IP scanner, NetBIOS scanner, network time synchronizer, ping, port scanner, share scanner, traceroute, and WHOIS. It is able to reveal detailed information about the running programs and processes, local shared resources, as well as system data. Clean feature lineup Although it comes packed with a lot of network-dedicated utilities, MegaPing sports a clean feature lineup. All tools are revealed in a tree-like display and with just one click on the target one, you can check out the corresponding configuration parameters. Scanning capabilities MegaPing gives you the possibility to work with different types of scanners, such as port (TCP and UDP ports), IP, NetBIOS, and share. You may scan individual computers, a range of IP addresses, domains, or the selected type of computers inside domains. It integrates a powerful security scanner that helps you get information about the NetBIOS name, configuration data, open TCP and UDP ports, transports, shares, users, groups, services, drivers, local drives, sessions, and printers. The scan results can be saved to HTML or plain text reports. Network tools MegaPing allows you to assess the performance of your network using various utilities, such as DNS list host, DNS lookup name, network time synchronizer, ping, traceroute, WHOIS, and Finger. Plus, you can log errors and check out real-time network connection status and protocols statistics. Process and system info The utility helps you view details about all running applications and kill the selected one, as well as check out info about processes (e.g. PID, memory usage, threads), modules and services. You can track all system connections, IP, ICMP, TCP and UDP statistics, interfaces, IP routing, and ARP data. Powerful functionality All in all, MegaPing comes with a multitude of utilities for helping you diagnose network issues and get information about your connections, and is suitable especially for system administrators. What is new in this release: Added support for Raw Packet mode. Added support for DNS over TCP tunnel. Added support for recursing hosts: Host(s) within the domain. Bug fixes. Microsoft Windows XP Service Pack 2 SP2 is the second servicing release for the Microsoft Windows XP

What's New In MegaPing?

MegaPing is a cross-platform tool for developing, debugging, analysing, optimizing, and monitoring of computer network and local network infrastructure, consisting of the client-side application and network monitoring server. It provides a set of utilities for network diagnostics, performance measurement and management, and network security assessment. MegaPing is able to reveal detailed information about the running programs and processes, local shared resources, as well as system data. The client-side tool has a simple interface and can be used by anyone, regardless of their level of expertise. The network monitor component, on the other hand, is written

with a view for highly-skilled administrators, service providers and security specialists. It comes with an extensive set of monitoring, performance analysis and optimization tools, as well as diagnostic utilities. Besides of the stock features, MegaPing is constantly updated with new features and new utilities, which means that you will always get the latest version with our new updates. The client-side application provides a set of network monitoring and optimization tools, such as the data analysis tool that provides data statistics, traffic visualizations and historical analysis and the performance management tool that monitors selected network parameters. Both components come with an advanced interface. It is possible to launch them directly from the network interface or be launched using command line interface, which makes it possible to incorporate a customized solution into a complex setup. Security management application The client-side application is an efficient and secure network monitoring toolkit that combines a set of useful tools for network security assessment and management. Main network monitoring features include a logger, which collects network data as well as the application's logs, a file sharing visualizer, an interesting picture visualizer and a local file share monitor. Besides of that, you can also use the traffic analyzer, which helps you reveal network traffic and correlate it with security data. This feature is especially useful for security auditors, IT and network administrators. Additional network tools include a process analyzer, an interface analyzer and a port scanner with a built-in protocol analyzer. Configuration and performance statistics MegaPing offers several parameters that can be configured via the configuration file, via the command line or the GUI settings dialog. The parameters include metrics display, statistics interval, and interface type. Besides of that, you can set up the period that will be used to calculate traffic statistics, the priority for zombie processes, as well as the analyzer and logger delays. The performance analysis tool will analyse networking information, like time and traffic consumption,

System Requirements For MegaPing:

Minimum: OS: Windows 7, 8.1, 10 (64-bit) Processor: Intel Core i3 (or later) Memory: 2 GB RAM Graphics: NVIDIA GeForce GTX 660 2 GB or AMD Radeon HD 7870 2 GB DirectX: Version 11 Storage: 5 GB available space Additional Notes: Requires the Microsoft.NET Framework 4.5 installed. Recommended: Process
