size American Airlines (AAL) is planning to raise ticket prices by about 4% on April 1 as it seeks to cover rising fuel costs. The company is readying a decrease in its already high fares, as the cost of jet fuel goes through the roof. That increase could take it into the red for the first time in 14 years, according to Morgan Stanley analyst Todd Bishop. The news comes as American is locked in a battle with frequent flier program SkyMiles. In 2013, the carrier became the first major U.S. airline to cut ties with the program, according to a January 9 filing with the U.S. Securities and Exchange Commission. Americans are on average spending more time traveling and sticking to their larger-cabin seats. American says that it expects to see its profit margins fall 2% to 3% this year as a result of rising fuel costs and rising air fares. How high a

fare increases for American will depend on how many passengers are on board, because a higher percentage of passengers on board means American would have to charge a higher fare. “Higher seat load factors allow for higher revenue per passenger mile,” writes Bishop. A lower load factor would hurt American’s revenue per seat hour. The airline has raised its air fares 11% so far this year, according to a blog post today from American (AAL) President Robert Isom. Isom wrote, “We are holding the line on fares and compensation as we continue to invest in our core airline and always deliver what our customers expect.” How American will approach its fare increase strategy is uncertain. It could be a sudden hike; it could be a more gradual increase that takes into account how passengers are spending their time on flights; or it could be something else entirely. The price

increase will not impact all routes, American said in the filing with the SEC. It will apply to trans-Atlantic flights to Europe and North America as well as flights to Asia and the Caribbean. The last time American raised fares, in 2003, it meant a 3.5% hike. This year, it will take its overall fares into the red. Its profit margin is down in every quarter, a trend that started last year, according to a Jan. 11 report in the Wall Street Journal. Write to Steven E.

EXE Download Crack..Q: Is it possible to
have a single XSLT file to output multiple
XML files in Apache Tika? We have a
bunch of images which needs to be
converted into PDF format. Before Tika,

we used XSLT to transform to PDF. We could have a single XSLT file to output multiple files (which were actually very similar, only the paths needed to be changed). Then we switched to Tika and other tools. Now our images are stored in SQL Server which uses ODBC for connections. We use Apache Tika to directly convert the images to PDFs through the following.

```
public void
convertPdfToImages(File doc,
OutputStream out) throws IOException {
Document document = new Document();
ByteArrayOutputStream outputStream = new
ByteArrayOutputStream();
XMLOutputFactory outputFactory =
XMLOutputFactory.newInstance();
XMLStreamWriter writer = outputFactory.
createXMLStreamWriter(outputStream); try {
// tag to convert the image ((Document)
document).createElement("image"); // tag
to convert the image ((Document)
document).createElement("attachment");
```

```
// tag to convert the image ((Document)
document).createElement("embed"); //
tag to convert the image ((Document)
document).createElement("xmp");
```
