3.4.2 Graphical User Interface Components The graphical user interface (GUI) of Sugar32 Chess allows to play chess games, analyze and print chess games. In the chess game view, you can select chess games from time-line and events view. You can play and analyze selected chess games through the GUI. As you move the mouse over a game, you can see a game information with the printed result, amount of moves and drawn positions. Playing and analyzing is done by selecting time-line, event or positions. There are many components that build the GUI. The following describes them. 3.4.2.1 Boards, Pieces, Games After restarting the GUI, Sugar32 Chess opens the board where you can play, analyze, and print games. The boards allows you to play, analyze or print games from the main Sugar Chess. The board contains information on the size of the game. From that

information, games can be played on the board. The board supports the number of events, players, time-line and the value of capture in the event window. In the piece view you can see the position of each piece of the game. The piece view supports you to play chess on the GUI. The game view supports you to play chess games, analysis and printing. The game has information about the value of capture, game and the result. It also contains the number of moves. The GUI supports you to take over a chess game to another player or analyze a chess game. To do this, Sugar has changed the game (without losing the move history) and opens the window of the game. 3.4.2.2 Panes Sugar32 Chess has an application framework (a system of independent units). This framework includes the GUI components. You can move the GUI components on the screen without changing the layout of the screen. Sugar32 Chess includes several window panes. The following describes the panes used in the GUI: Event Window 1. Overview: At the top of the window you can view information about the game and events. You can see one game or multiple games in a time-line. In the right-top corner you see information about the game being played. 2. Event Sheet: When you play or analyze a game, you can select a time-line. The time-lines are for events or chess games. At the bottom you see information about the 0cc13bf012
