Download a free trial of Magix Photo Studio Light up creative ideas with over 27.Home blood pressure determinations in the diagnosis of hypertension. A prospective controlled study was conducted to compare the significance of home blood pressure readings obtained over a period of two weeks with conventional office blood pressure measurements in patients with newly diagnosed essential hypertension. Conventional and home measurements were obtained from seventy patients with newly diagnosed essential hypertension. Blood pressures were also obtained from thirty-three

---

normotensive individuals. During the two weeks prior to this study, patients were put on a standardized antihypertensive program that included monitoring the level of hypertension. After a two-week period, patients were assigned to three groups according to their office blood pressure levels: mild hypertension, 20 to 199 mm Hg; moderate hypertension, greater than or equal to 200 to 249 mm Hg; and severe hypertension, greater than or equal to 250 mm Hg. Patients who had  $\geq 10$  mm Hg diastolic blood pressure readings at home and a good quality home blood pressure measurement were placed in the hypert

with stage III and IV Hodgkin's disease (9 with bulky disease) received four cycles of bleomycin, vinblastine, etoposide, and cisplatin (B-VEP) at doses of 140 mg/m<sup>2</sup>/day (IV days 1 and 15), 12 mg/m<sup>2</sup>/day (IV days 1 and 15), 80 mg/m<sup>2</sup>/day (days 1 and 15), and 12 mg/m<sup>2</sup>/day (days 1 and 15), respectively. One patient achieved a complete response, eight patients achieved a partial remission, and four had stable disease. Four patients experienced dose-limiting toxicity. Toxicities were gastrointestinal (grade 3 diarrhea and nausea) and hematologic (grade 3 thrombocytopenia and grade 4 neutropenia). Dose reductions were not required. B-VEP produced a complete response in one patient with a bulky mediastinal mass, a partial response in eight patients, and stable disease in five patients. B-VEP is an active combination with limited myelotoxicity. This regimen offers a safe treatment of advanced Hodgkin's disease.

Q: Finding a derivative I have been given the following to find the derivative:  $\frac{dy}{dx} = y^2$  I have worked out that:  $\frac{dy}{dx} = y \cdot \frac{dy}{dy} = y \cdot y = y^2$  (I'm assuming  $\frac{dy}{dy}$  refers to the derivative of  $y$  with respect to  $y$ ) However I was wondering if I could simply divide the equation by  $y$  to get:  $\frac{y}{y} = y$
