A.3.4 Application support Autodesk's AutoCAD supports both local and remote computing environments and comes with many free support tools. Several different connection types are supported including: Remote Desktop, FTP, Web-based Internet connections using HTTPS or IIS and local network connections using Windows VPN or Dynamic Host Configuration Protocol (DHCP) provided services. A text-based Remote Desktop Application Programming Interface (RDP API) is available which allows a remote server to remotely control the client application using the same set of command line arguments and displays as the client application. The Windows interface has the ability to connect to remote AutoCAD sessions, both automatically, or through a Remote Desktop Services (RDS) (Microsoft Remote Desktop Services), or an RDS client. Remote access allows support personnel to access drawings, share files, and connect to meetings, while a client may connect to the drawings via a web browser for the purpose of viewing and printing drawings. Connection options include viewing drawings, opening or saving files, and inserting pages of drawings into a layout. A.3.4.1 Mapping software AutoCAD supports mapping software such as: AutoCAD Map 3D, an interactive 3D map based on the current drawing AutoCAD Map 3D Pro, a high performance, non-interactive 3D map database AutoCAD Map Professional, an interactive 3D map based on the current drawing AutoCAD Map Standard, an interactive 2D map based on the current drawing AutoCAD Map Standard 2D, an interactive 2D map based on the current drawing AutoCAD Map 2D, an interactive 2D map based on the current drawing AutoCAD Map Basic, an interactive 2D map based on the current drawing AutoCAD Map, a 2D map based on the current drawing AutoCAD Map 2D Standard, an interactive 2D map based on the current drawing AutoC af5dca3d97
