A: In any case, how can I register System.2acc conflict and what can I do? I think you want to restore the system to an earlier state. A System Restore will do that. Also, it's not clear if your install is complete, or how you got into this problem. If you aren't seeing a System.2acc conflict file, that suggests you have deleted or overwritten it with something. You should look at the system restore points on your computer. You can get to these by opening the Windows Explorer and clicking on the little clock in the lower right side. Then click on System Restore. I think it's the one just to the right of the desktop. 6d1f23a050
